Hi Jim,

Thanks for your email and enquiry, please find attached our fee proposal for the Section 73, Major Works (Sewer and Potable Water) design and project management services as required by Sydney Water for the proposed development.

The purpose of the Section 73 is to ensure that the proposed development has a sewer point of connection and frontage to a potable water. Our fee proposal includes submission of the Section 73 application on your behalf to Sydney Water, and payment of Sydney Water's application fee. It also includes the sewer and potable water designs, work-as-constructed plans, project management, site supervision of the sewer/water connections and project completion package submission to Sydney Water so that they can update their records and issue the Section 73 Compliance Certificate.

The other Sydney Water requirement is the building plan approval (aka tap in) for your Construction certificate, which has been included as part of our fee proposal also. Please note our construction department would be more than happy to provide a fee proposal for the construction of the new sewer/water connections once the design and scope of works has been confirmed.

To proceed with the section 73 and tap in, please complete and return the attached PO to get the process underway.

Alternatively, if you have any queries please don't hesitate to contact Jeanette.

Subject: Fwd: New project section 73 application

Dear sir/Madam,

can you please quote me a section 73 application for the attached project drawings.

Thank you

Jim Ding
